

## **The Urantia Book and Quantum Physics - Part 3 - Mind Systems**

Section 10 of *The Urantia Book's* Paper 42 on *Energy–Mind and Matter* is called **Universal Nonspiritual Energy Systems - (Material Mind Systems)**.

*“The endless sweep of relative cosmic reality, from the absoluteness of Paradise monota to the absoluteness of space potency, is suggestive of certain evolutions of relationship in the nonspiritual realities of the First Source and Center—....”*

*“The universal nonspiritual energies are reassociated in the living systems of non-Creator minds on various levels, certain of which may be depicted as follows:*

1. *Preadjutant-spirit minds.* This level of mind is nonexperiencing and on the inhabited worlds is ministered by the Master Physical Controllers. This is mechanical mind, the nonteachable intellect of the most primitive forms of material life, but the nonteachable mind functions on many levels beside that of primitive planetary life.
2. *Adjutant-spirit minds.* This is the ministry of a local universe Mother Spirit functioning through her seven adjutant mind-spirits on the teachable (nonmechanical) level of material mind. On this level material mind is experiencing: as subhuman (animal) intellect in the first five adjutants; as human (moral) intellect in the seven adjutants; as superhuman (midwayer) intellect in the last two adjutants.
3. *Evolving morontia minds*—the expanding consciousness of evolving personalities in the local universe ascending careers. This is the bestowal of the local universe Mother Spirit in liaison with the Creator Son. This mind level connotes the organization of the morontia type of life vehicle, a synthesis of the material and the spiritual which is effected by the Morontia Power Supervisors of a local universe. Morontia mind functions differentially in response to the 570 levels of morontia life, disclosing increasing associative capacity with the cosmic mind on the higher levels of attainment. This is the evolutionary course of mortal creatures, but mind of a nonmorontia order is also bestowed by a Universe Son and a Universe Spirit upon the nonmorontia children of the local creations.
- “[4] *The cosmic mind.* This is the sevenfold diversified mind of time and space, one phase of which is ministered by each of the Seven Master Spirits to one of the seven superuniverses. The cosmic mind encompasses all finite-mind levels and co-ordinates experientially with the evolutionary-deity levels of the Supreme Mind and transcendently with the existential levels of absolute mind—the direct circuits of the Conjoint Actor.” (UB42:10.1-6)

### **11. Universe Mechanisms**

*“In the evaluation and recognition of mind it should be remembered that the universe is neither mechanical nor magical; it is a creation of mind and a mechanism of law. But while in practical application the laws of nature operate in what seems to be the dual realms of the physical and the spiritual, in reality, they are one. The First Source and Center is the primal cause of all materialization and at the same time the first and final Father of all spirits. The Paradise Father appears personally in the extra-Havona universes only as pure energy and pure spirit—as the Thought Adjusters and other similar fragmentations.*

*“Mechanisms do not absolutely dominate the total creation; the universe of universes in toto is mind planned, mind made, and mind administered. But the divine mechanism of the universe of universes is altogether too perfect for the scientific methods of the finite mind of man to discern even a trace of the dominance of the infinite mind. For this creating, controlling, and upholding mind is neither material mind nor creature mind; it is spirit-mind functioning on and from creator levels of divine reality.*

*“The ability to discern and discover mind in universe mechanisms depends entirely on the ability, scope, and capacity of the investigating mind engaged in such a task of observation. Time-space minds, organized out of the energies of time and space, are subject to the mechanisms of time and space.*

*“Motion and universe gravitation are twin facets of the impersonal time-space mechanism of the universe of universes. The levels of gravity response for spirit, mind, and matter are quite independent of time, but only true spirit levels of reality are independent of space (nonspatial). The higher mind levels of the universe—the spirit-mind levels—may also be nonspatial, but the levels of material mind, such as human mind, are responsive to the interactions of universe gravitation, losing this response only in proportion to spirit identification. Spirit-reality levels are recognized by their spirit content, and spirituality in time and space is measured inversely to the linear-gravity response.*

*“Linear-gravity response is a quantitative measure of nonspirit energy. All mass—organized energy—is subject to this grasp except as motion and mind act upon it. Linear gravity is the short-range cohesive force of the macrocosmos somewhat as the forces of intra-atomic cohesion are the short-range forces of the microcosmos. Physical materialized energy, organized as so-called matter, cannot traverse space without affecting linear-gravity response. Although such gravity response is directly proportional to mass, it is so modified by intervening space that the final result is no more than roughly approximated when expressed as inversely according to the square of the distance. Space eventually conquers linear gravitation because of the presence therein of the antigravity influences of numerous supermaterial forces which operate to neutralize gravity action and all responses thereto.*

*“Extremely complex and highly automatic-appearing cosmic mechanisms always tend to conceal the presence of the originative or creative indwelling mind from any and all intelligences very far below the universe levels of the nature and capacity of the mechanism itself. Therefore is it inevitable that the higher universe mechanisms must appear to be mindless to the lower orders of creatures. The only possible exception to such a conclusion would be the implication of mindedness in the amazing phenomenon of an apparently self-maintaining universe—but that is a matter of philosophy rather than one of actual experience.*

*“Since mind co-ordinates the universe, fixity of mechanisms is nonexistent. The phenomenon of progressive evolution associated with cosmic self-maintenance is universal. The evolutionary capacity of the universe is inexhaustible in the infinity of spontaneity. Progress towards harmonious unity, a growing experiential synthesis superimposed on an ever-increasing complexity of relationships, could be effected only by a purposive and dominant mind.*

*“The higher the universe mind associated with any universe phenomenon, the more difficult it is for the lower types of mind to discover it. And since the mind of the universe mechanism is creative spirit-mind (even the mindedness of the Infinite), it can never be discovered or*

*discerned by the lower-level minds of the universe, much less by the lowest mind of all, the human. The evolving animal mind, while naturally God-seeking, is not alone and of itself inherently God-knowing.” (UB42:1-8)*

## **12. Pattern and Form—Mind Dominance**

“The evolution of mechanisms suggests the hidden influence of the creative mind. The capacity of human intellect to imagine, design, and construct automatic mechanisms highlights the superior, creative, and purposeful attributes of the human mind as the leading force on the planet. The mind consistently strives towards:”

1. Creation of material mechanisms.
2. Discovery of hidden mysteries.
3. Exploration of remote situations.
4. Formulation of mental systems.
5. Attainment of wisdom goals.
6. Achievement of spirit levels.
7. The accomplishment of divine destinies—supreme, ultimate, and absolute.

*“Mind is always creative. The mind endowment of an individual animal, mortal, morontian, spirit ascender, or finality attainer is always competent to produce a suitable and serviceable body for the living creature identity. But the presence phenomenon of a personality or the pattern of an identity, as such, is not a manifestation of energy, either physical, mental, or spiritual. The personality form is the pattern aspect of a living being; it connotes the arrangement of energies, and this, plus life and motion, is the mechanism of creature existence.*

*“Even spirit beings have form, and these spirit forms (patterns) are real. Even the highest type of spirit personalities have forms—personality presences in every sense analogous to Urantia mortal bodies. Nearly all beings encountered in the seven superuniverses are possessed of forms. But there are a few exceptions to this general rule: Thought Adjusters appear to be without form until after fusion with the surviving souls of their mortal associates. Solitary Messengers, Inspired Trinity Spirits, Personal Aids of the Infinite Spirit, Gravity Messengers, Transcendental Recorders, and certain others are also without discoverable form. But these are typical of the exceptional few; the great majority have bona fide personality forms, forms which are individually characteristic, and which are recognizable and personally distinguishable.*

*“The liaison of the cosmic mind and the ministry of the adjutant mind-spirits evolve a suitable physical tabernacle for the evolving human being. Likewise does the morontia mind individualize the morontia form for all mortal survivors. As the mortal body is personal and characteristic for every human being, so will the morontia form be highly individual and adequately characteristic of the creative mind which dominates it. No two morontia forms are any more alike than any two human bodies. The Morontia Power Supervisors sponsor, and the attending seraphim provide, the undifferentiated morontia material wherewith the morontia life can begin to work. And after the morontia life it will be found that spirit forms are equally diverse, personal, and characteristic of their respective spirit-mind indwellers.*

*“On a material world you think of a body as having a spirit, but we regard the spirit as having a body. The material eyes are truly the windows of the spirit-born soul. The spirit is the architect, the mind is the builder, the body is the material building.*

*“Physical, spiritual, and mindal energies, as such and in their pure states, do not fully interact as actuals of the phenomenal universes. On Paradise the three energies are co-ordinate, in Havona co-ordinated, while in the universe levels of finite activities there must be encountered all ranges of material, mindal, and spiritual dominance. In nonpersonal situations of time and space, physical energy seems to predominate, but it also appears that the more nearly spirit-mind function approaches divinity of purpose and supremacy of action, the more nearly does the spirit phase become dominant; that on the ultimate level spirit-mind may become all but completely dominant. On the absolute level spirit certainly is dominant. And from there on out through the realms of time and space, wherever a divine spirit reality is present, whenever a real spirit-mind is functioning, there always tends to be produced a material or physical counterpart of that spirit reality.*

*“The spirit is the creative reality; the physical counterpart is the time-space reflection of the spirit reality, the physical repercussion of the creative action of spirit-mind.*

*“Mind universally dominates matter, even as it is in turn responsive to the ultimate overcontrol of spirit. And with mortal man, only that mind which freely submits itself to the spirit direction can hope to survive the mortal time-space existence as an immortal child of the eternal spirit world of the Supreme, the Ultimate, and the Absolute: the Infinite.” [See footnote 4.] (UB42:12.1-15)*
