A map made by Brent Tully's group from 2014. It shows NOT the distribution of visible galaxies, but a prediction of the MOTION of those galaxies when they add the gravitational effect of a distribution of invisible mass, or "dark matter" (segregata and ultimata).

“[...], the Uversa physicists have detected early evidence of **force manifestations** more than fifty million light-years beyond the outermost ranges of the phenomena in the **first outer space level**.”

“These activities undoubtedly presage the organization of the material creations of the **second outer space level** ...” (12:1.15, 130.1)

**SUMMARY: A FUNCTIONAL
PRESENTATION OF GOD THE SEVENFOLD**

GOD THE SEVENFOLD	A Three-Level Grouping of God the Sevenfold
(1) The Creator Sons	THE SUPREME CREATORS. These three groups are the Corps of the Supreme Creators. They are the post-Havona creators of the universes of time and space, the local universes and the superuniverses.
(2) The Ancients of Days	They work with the Deities and Trinity of Paradise to evolve the power of the Almighty, which is the
(3) The Master Spirits	experiential basis for the emerging sovereignty of the Supreme Being in the superuniverses.
(4) The Supreme Being	ALMIGHTY POWER, deriving from all the Supreme Creators, is joined with the spirit person of the Supreme, deriving from the Paradise Trinity, by the action of Supreme Mind, which was bestowed by the Conjoint Actor. This takes place on the pilot world of the outer circuit of the central universe.
(5) The Infinite Spirit	TRIUNE PARADISE DEITY is the name sometimes used to designate this group, and sometimes it is the Paradise Trinity. We believe it likely that the
(6) The Eternal Son	Supreme Creators work with Paradise Deity in both respects – as the Three Persons and as the Trinity.
(7) The Universal Father	The "union of the creative power of the Supreme Creators with the creative potentials of the Trinity is the very source of the actuality of the Supreme Being."

See Appendix XXII., Sec. 5. Finite Power-Personality Synthesis ^{[145].})

SUMMARY: A THREE-WAY CLASSIFICATION OF THE SEVEN ABSOLUTES OF INFINITY

I THE ABSOLUTE ORIGINAL. Since we are going to divide Reality between Actual and Potential, we immediately encounter the problem of how to classify God himself. He started it all, so (in a way) he is before either Actuals or Potentials. For this reason, it seems best to place him in a class all by himself:

(1) GOD, THE UNIVERSAL FATHER. He is truly infinite; he is the Source of all sources and the Center of all centers; all Reality (and especially personality) comes from him.

II THE ABSOLUTE ACTUALS. These are sometimes called the Absolutes of Actuality. They are classified as "actual" because they are fully and factually in existence, and their universal gravity circuits control everything else that is actual.

(2) THE ETERNAL SON. The Absolute Person, the source and center of all things spiritual; universal and absolute spirit-gravity is centered in him.

(3) THE ISLE OF PARADISE. The Absolute Machine, the source and center of all things physical; it is the center of universal and absolute material gravity.

(4) THE INFINITE SPIRIT. The God of Action, the Father-Son in action; the source and center of mind; universal and absolute mind-gravity centers in him.

III THE ABSOLUTE POTENTIALS. These are sometimes called the Absolutes of Potentiality. They are called "potential" because they are limitless reservoirs. They provide the "room" and the "stuff" out of which all of the post-Havona persons and universes have been created.

(5) THE DEITY (QUALIFIED) ABSOLUTE. This is the potential, the reservoir out of which emerge all new beings and other realities that are spiritual and divine.

(6) THE UNQUALIFIED ABSOLUTE. This is the non-deity (not-deity) reservoir out of which emerge all of the physical energies that are organized into the new material universes—the nebulae, stars, and planets of space.

(7) THE UNIVERSAL ABSOLUTE. This is the Absolute that links the other two together. This Absolute is a part of the Reality that is classified as Deity and has to do with keeping everything in balance.

(Appendix VII, Sec. 1. The Sources of Growth: Original, Actual, and Potential)

SUMMARY: THE SEVEN LEVELS OF TOTAL DEITY FUNCTION

I PRECREATIVE LEVELS. Since these levels are precreative, they are originally occupied by existential Deity before the organization of the master universe. The Associative and Potential Levels are, later on, also penetrated by experiential Deity, by the Supreme and the Ultimate. (See Second Prologue, Sec. 2., for our original study of these three levels)

(1) **THE STATIC LEVEL.** Here, Deity is quiet and unmoving. No plans have yet been made. God is self-existent and self-contained. God is!

(2) **THE POTENTIAL LEVEL.** Here God has begun to plan, and these plans have accordingly become possibilities, potentials. We here encounter the Absolutes of Potentiality.

(3) **THE ASSOCIATIVE LEVEL.** Here God has unified the two Absolutes (Qualified and Unqualified) in the Universal Absolute. He has also unified all Deity in the Paradise Trinity.

II OUTGOING LEVELS. These levels are designated as outgoing, because on them, Deity is expansive and distributive. Here Deity is revealed to creatures, and thereon Deity becomes identified with creatures, goes into partnership with them.

(4) **THE CREATIVE LEVEL.** On this level, Deity is beginning to draw upon the Absolutes of Potentiality in bringing new things and new beings into existence. The original expression of creative Deity is God the Sevenfold (See Chapter I, Sec. 2. God the Sevenfold: Creative Deity)

(5) **THE EVOLUTIONAL LEVEL.** On this level we encounter creativity linked with time, creativity in which even creatures can participate. On this level, Deity evolves. (See Chapter II, Sec. 2. God the Sevenfold. Evolutional Deity)

III INCOMING LEVELS. These levels are designated incoming, because on them Deity is consolidating and unifying everything that has taken place. The first such consolidation is on the finite levels; the second on absonite levels.

(6) **THE SUPREME LEVEL.** This is the level of Deity in relation to the finite. On this level Deity consolidates all of the activities of the finite and unifies them in the Supreme. (See Chapter III, Sec. 1. The Emergence of the Supreme Being)

(7) **THE ULTIMATE LEVEL.** This is the level of Deity in relation to the absonite. On this level, Deity consolidates all of the activities of the absonite and unifies them in the Ultimate. (See)

Central Universe, the Paradise-Havona System Schematic Representation

- ⑧ Havona consists of one billion perfect worlds revolving around Paradise in seven concentric circuits. The Havona worlds consist of one thousand elements and seven forms of energy. Each world is unique. Havona natives are the children of the Trinity. There is no government on the Havona worlds. The standard time of the grand universe is the Paradise-Havona day—a little over seven minutes less than one thousand years of Urantia time. There are seven forms of life in Havona. Sin has never appeared in Havona. The Deities derive varied satisfactions from the perfect Havona universe.

The Egyptians called this city of ancient glory Dilmāt, while the later Adamized Sumerians confused both the first and second Nodite cities with Dalamatia and called all three Dilmun. And already have archaeologists found these ancient Sumerian clay tablets which tell of this earthly paradise “where the Gods first blessed mankind with the example of civilized and cultured life.”

A description of the nucleus of the cosmos according to Urantia Book

"The perfect and divine universe occupies the center of all creation; it is the eternal core around which the vast creations of time and space revolve. Paradise is the gigantic nuclear Isle of absolute stability which rests motionless at the very heart of the magnificent eternal universe." [152:1]

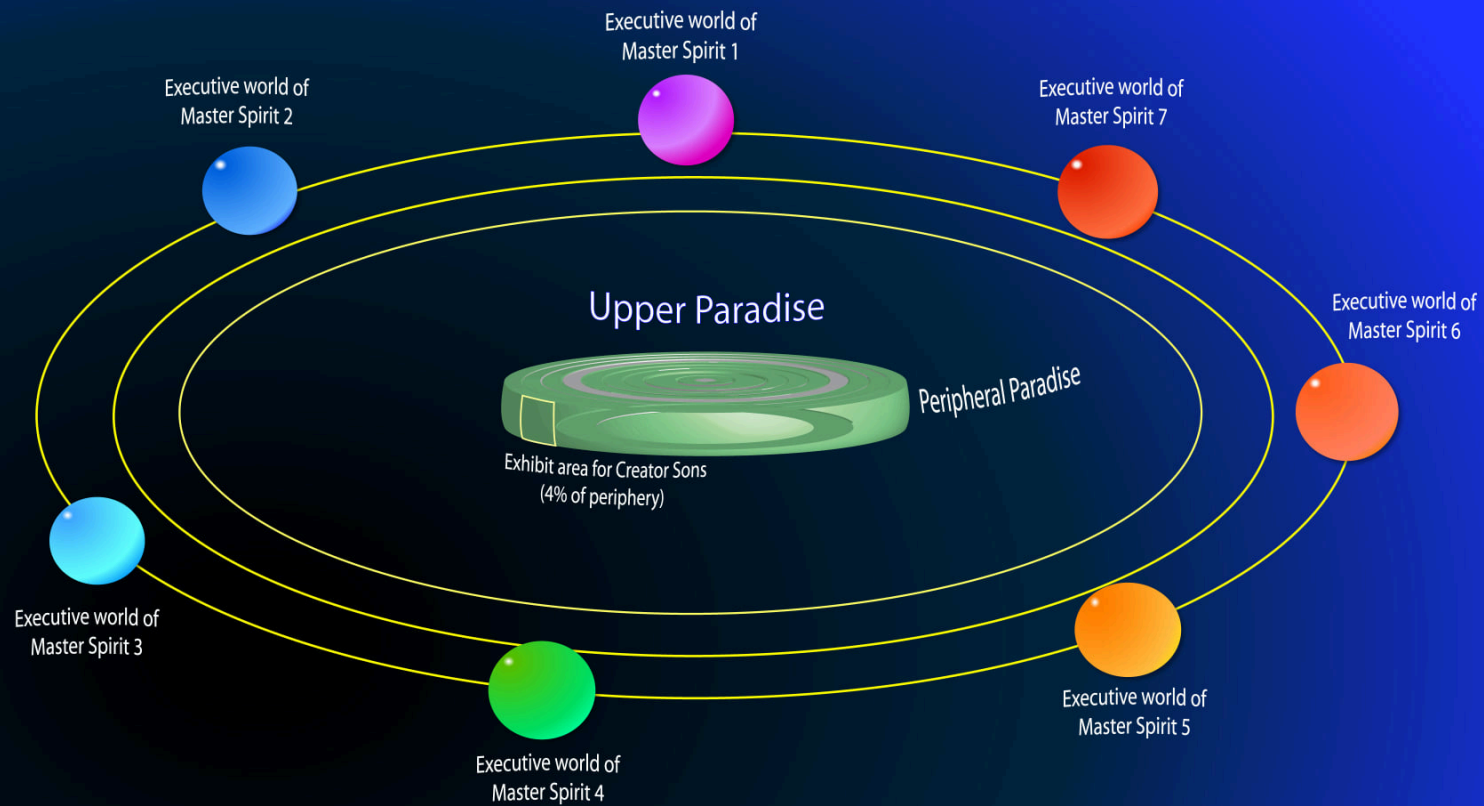

Central Isle is the only motionless creation in the whole cosmos. Time and space will start outside the central Isle.

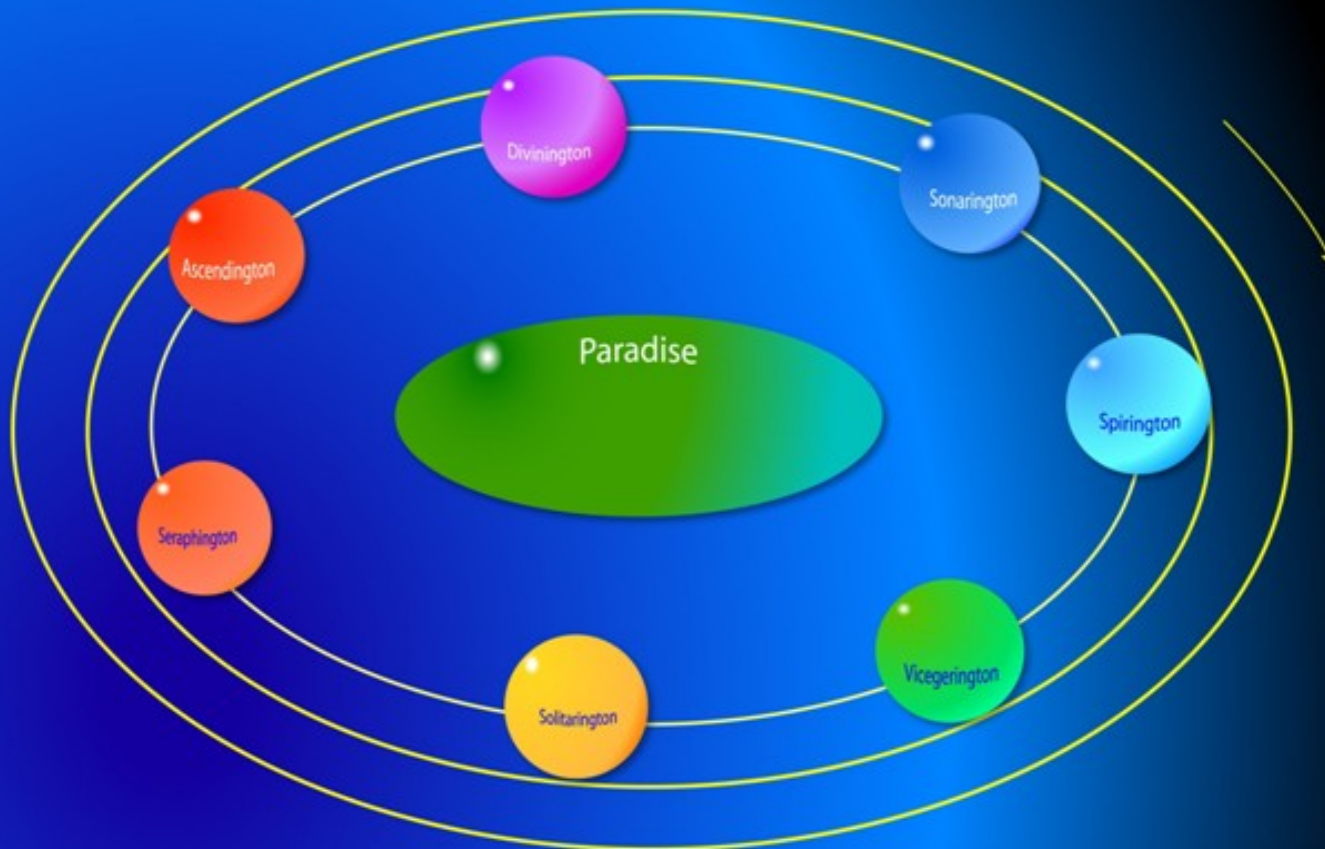

Immediately outside the Isle there will be twenty one satellite spheres and one billion inhabited worlds of Havona. From the direction of the Seven Superuniverses you cannot see this Central Universe, since it is hidden by enormous zone of dark gravity bodies.

"this perfect abode of the Universal Father is the real and far-distant destiny of the immortal souls of the mortal and material sons of God, the ascending creatures of the evolutionary worlds of time and space."[127:6]

(P.150 - §5) The executive abodes of the Seven Master Spirits are, in reality, the Paradise headquarters of the seven superuniverses and their correlated segments in outer space. Each Master Spirit presides over one superuniverse, and each of these seven worlds is exclusively assigned to one of the Master Spirits.

(P.207 - §12) There are seven worlds in the innermost circuit of the Paradise satellites, and each of these exalted worlds is presided over by a corps of ten Trinitized Secrets of Supremacy. They are not creators, but they are supreme and ultimate administrators. The conduct of the affairs of these seven fraternal spheres is wholly committed to this corps of seventy supreme directors.

Space Respiration (Movement)

Previous state

Vertical expansion of vertical extension of space (reservoir)

As the universes of the horizontal extension of pervaded space expand, the reservoirs of the vertical extension of unpervaded space contract and vice versa.

"Unpervaded" space means: unpervaded by those forces, energies, powers, and presences known to exist in pervaded space.

The cycles of space respiration extend in each phase for a little more than one billion Urantia years. During one phase the universes expand; during the next they contract. When the universes expand and contract, the material masses in pervaded space alternately move against and with the pull of Paradise gravity. The work that is done in moving the material energy mass of creation is space work but not power-energy work.

Current state

Vertical expansion of vertical extension of space (reservoir)

Revolution of power-energy out from Paradise, its materialization and dematerialization

For a billion years of Urantia time the space reservoirs contract while the master universe and the force activities of all horizontal space expand. It thus requires a little over two billion Urantia years to complete the entire expansion-contraction cycle.

Pervaded space is now approaching the mid-point of the expanding phase, while unpervaded space nears the mid-point of the contracting phase, and we are informed that the outermost limits of both space extensions are, theoretically, now approximately equidistant from Paradise.

SPACE RESPIRATION

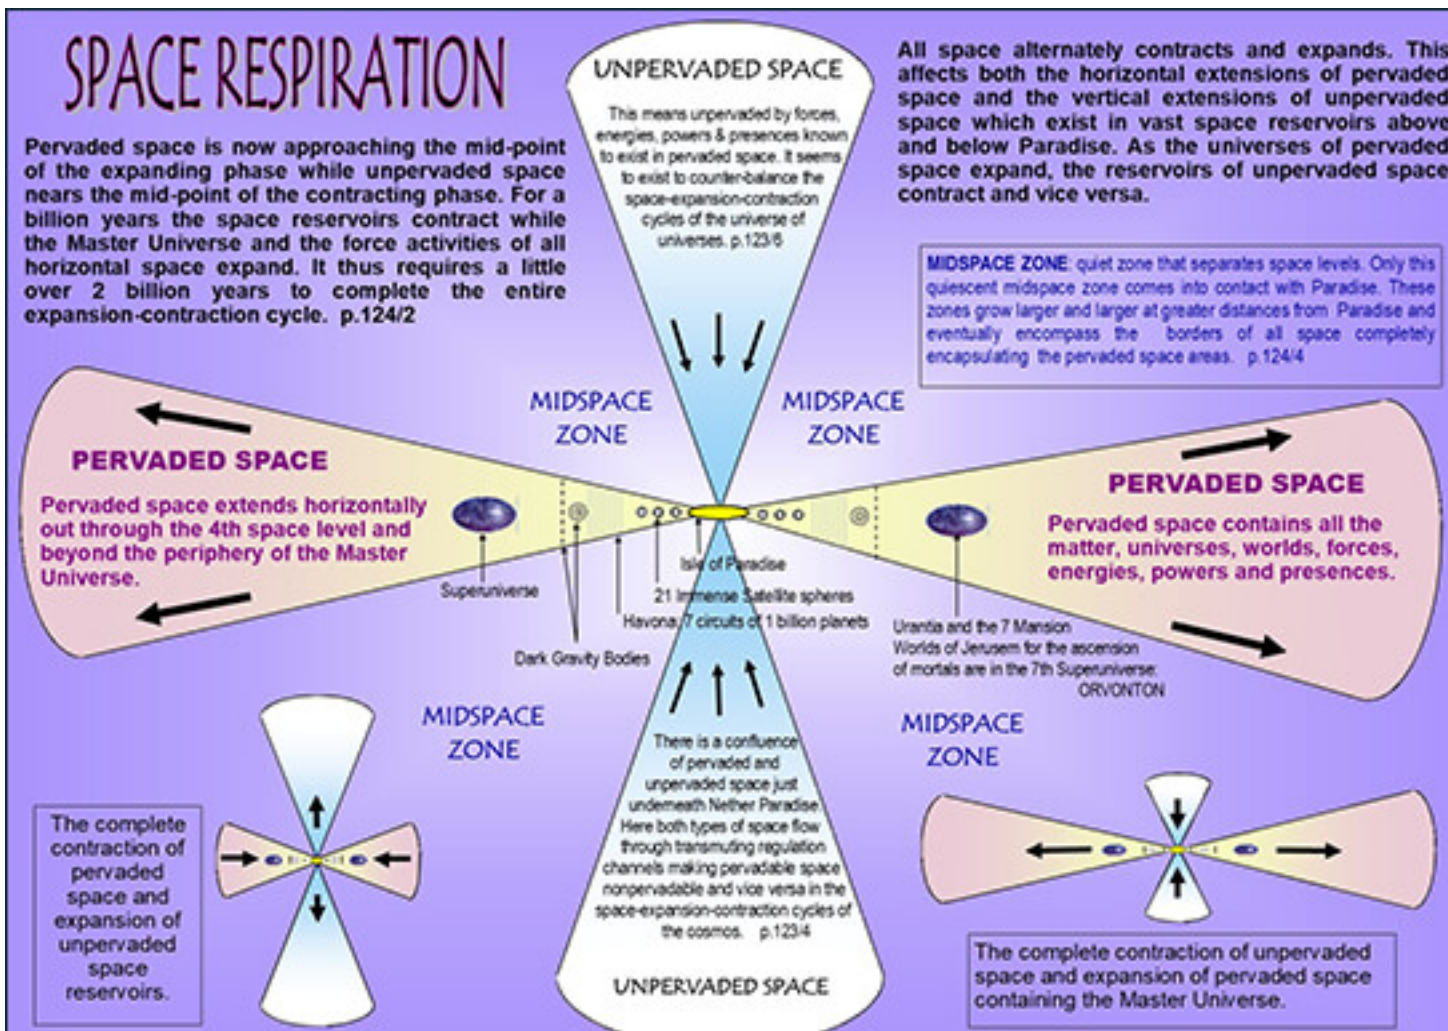

SPACE RESPIRATION

Pervaded space is now approaching the mid-point of the expanding phase while unpervaded space nears the mid-point of the contracting phase. For a billion years the space reservoirs contract while the Master Universe and the force activities of all horizontal space expand. It thus requires a little over 2 billion years to complete the entire expansion-contraction cycle. p.124/2

All space alternately contracts and expands. This affects both the horizontal extensions of pervaded space and the vertical extensions of unpervaded space which exist in vast space reservoirs above and below Paradise. As the universes of pervaded space expand, the reservoirs of unpervaded space contract and vice versa.

MIDSPACE ZONE: quiet zone that separates space levels. Only this quiescent midspace zone comes into contact with Paradise. These zones grow larger and larger at greater distances from Paradise and eventually encompass the borders of all space completely encapsulating the pervaded space areas. p.124/4

SPACE RESPIRATION

Pervaded space is now approaching the mid-point of the expanding phase while unpervaded space nears the mid-point of the contracting phase. For a billion years the space reservoirs contract while the Master Universe and the force activities of all horizontal space expand. It thus requires a little over 2 billion years to complete the entire expansion-contraction cycle. p.124/2

UNPERVADED SPACE

This means unpervaded by forces, energies, powers & presences known to exist in pervaded space. It seems to exist to counter-balance the space-expansion-contraction cycles of the universe of universes. p.123/6

All space alternately contracts & expands. This affects both the horizontal extensions of pervaded space & the vertical extensions of unpervaded space which exist in vast space reservoirs above & below Paradise. As the universes of pervaded space expand, the reservoirs of unpervaded space contract and vice versa.

There is a confluence of pervaded and unpervaded space just underneath Nether Paradise. Here both types of space flow through transmuting regulation channels making pervadable space nonpervadable and vice versa in the space-expansion-contraction cycles of the cosmos. p.123/4

UNPERVADED SPACE

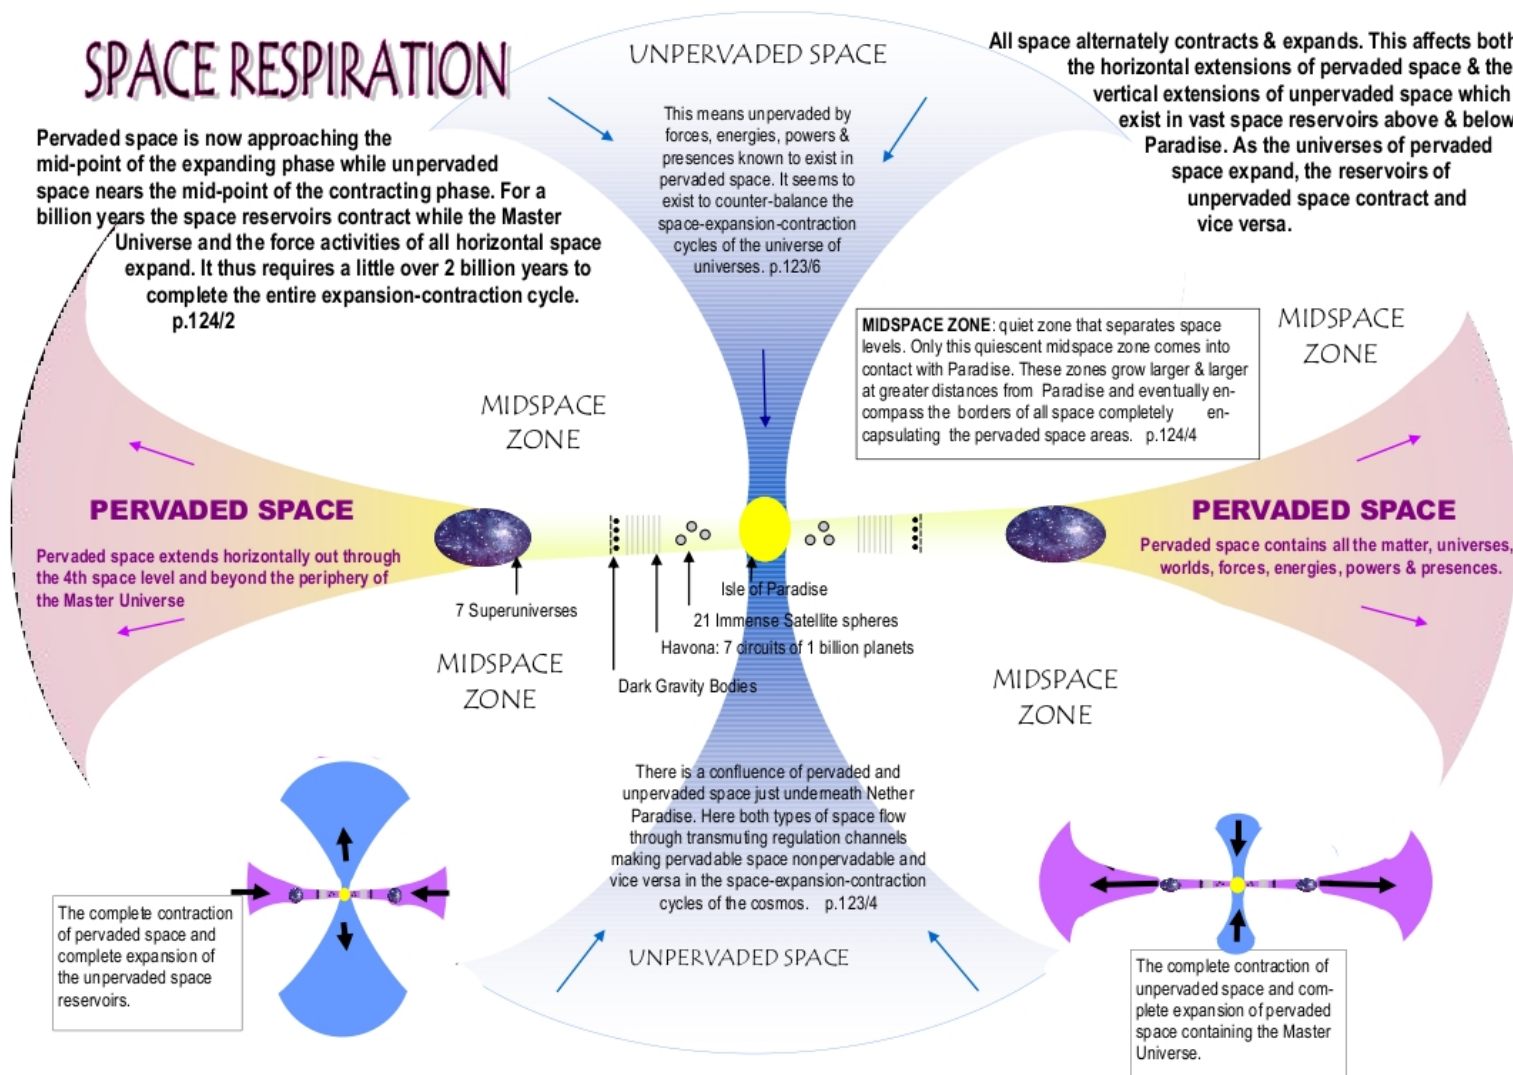

PERVADED SPACE

Pervaded space contains all the matter, universes, worlds, forces, energies, powers & presences.

The UNIVERSE of Universes, side view

Gravity systems of master universe :

Physical Gravity :

The central universe and the surrounding seven superuniverses are at the present time making use of only about five per cent of the active functioning of the Paradise absolute-gravity grasp.

Spiritual Gravity :

At the present time practically the entire spirit gravity of the Eternal Son, computed on this theory of totality, is observable as functioning in the grand universe. It says, that the universes now evolving in outer space are at the present time wholly nonspiritual.

Mind Gravity :

About eighty-five per cent of the mind-gravity response to the intellectual drawing of the Infinite Spirit takes origin in the existing grand universe. This would suggest the possibility that mind activities are involved in connection with the observable physical activities now in progress throughout the realms of outer space. The intelligent force organizers are at present directing universe evolution in the space levels beyond the present outer limits of the grand universe. Whatever the nature of this postulated intelligence, it is apparently not spirit-gravity responsive.

Personality Gravity :

Personality Gravity directs by the Universal Father. Personality Gravity is possible to recognize, but it cannot be measured either qualitative or quantitative realities responsive thereto.

All forms of force-energy—material, mindal, or spiritual—are alike subject to those grasps, those universal presences, which Celestial Teachers call gravity.

Personality also is responsive to gravity—to the Father's exclusive circuit.

"...Consider the Greeks, who have a science without religion, while the Jews have a religion without science. And when men become thus misled into accepting a narrow and confused disintegration of truth, their only hope of salvation is to become truth-co-ordinated--converted." Jesus

TRUTH CONVERSION

...Gautama Siddhartha had a similar experience the night he sat alone and sought to penetrate the mystery of final truth. Many others have had like experiences, and many true believers have progressed in the spirit without sudden conversion.

The URANTIA Book

God's Relation to the Individual 1. The Approach to God

5:1.12 (64.3) The great God makes direct contact with mortal man **and gives a part** of his infinite and eternal and incomprehensible self to live and **dwell within him**. God has embarked upon the eternal adventure with man. If you yield to the leadings of the spiritual forces in you and around you, you cannot fail to attain the high destiny established by a **loving God** as the **universe goal** of his ascendant creatures from the evolutionary worlds of space.

The Urantia Book 

REALITY GROWTH is conditioned by the circumstances of **THE SUCCESSIVE UNIVERSE AGES**. The **CENTRAL UNIVERSE** underwent no evolutionary change in **THE HAVONA AGE**, but in **THE PRESENT EPOCHS OF THE SUPERUNIVERSE AGE** it is undergoing certain progressive changes induced by co-ordination with the evolutionary superuniverses. The **SEVEN SUPERUNIVERSES**, now evolving, will sometime attain the settled status of light and life, will attain the growth limit for **THE PRESENT UNIVERSE AGE**. But beyond doubt, **THE NEXT AGE, THE AGE OF THE FIRST OUTER SPACE LEVEL**, will release the **SUPERUNIVERSES** from the destiny limitations of **THE PRESENT AGE**. Repletion is continually being superimposed upon completion. **[UB 106:0.18]**

"Behold, I stand at the doors of men's hearts and knock,
and if any man will open to me, I will come in and
sup with him and will feed him with
the bread of life; we shall be
one in spirit and purpose,
and so shall we ever be
brethren in the long
and fruitful service
of the search for
the Paradise Father."
