“Another Piece of the Puzzle”

Thought Adjuster Insights From the Desk of Chris Maurus

A series of events have been unfolding over the last few weeks and have ignited my curiosity to ask questions that have led to some astonishing insights. Many of you may be aware of what is happening in the skies above the US and around the world in the form of UAPs, Drones, Orbs, and other puzzling phenomenon. I’m not going to add to the speculation of that per say, but it did lead me to discover other more spiritually pertinent content that has led to insights and the “connecting of dots” for some age old questions that have puzzled me and many others for some time.

When I began my own investigation into this most interesting phenomenon of the UAP, Drones, and Orbs, I began to feel this “inner drive” to consume a mass amount of information similar to the experience I had many years ago when I was driven to consume large amounts of spiritual based content from many current and esoteric sources. Later I learned that this was a method of spiritual guidance to build a library that could be used to better articulate the insights given from Spirit.

Whatever you or I believe about this latest phenomenon is speculation at the time of this writing, but knowing the history of the Military Industrial Complex and nearly 80 years of secrecy and black budgets that would dwarf the economies of many second and third world countries, it is more than likely that the mechanical terrors we are seeing in the night sky (drones) are man-made. What peeked my curiosity was not the drones, but the Orbs. These mysterious entities seemed to have a more off-world organic nature, alive, and perhaps sentient in the form of plasma or what is being called, “Plasmoids.” See Below.

What has been often referred to as the “fourth state of matter,” plasma is a natural occurring substance that makes up 99% of the known universe of which the 1% of material matter: gas, liquid, and solids are born. This curiosity led me to an author and film maker, Dana Kipple (<https://www.danakippel.com>) and her very interesting Tik-Tok video series on plasma: <https://www.tiktok.com/@danakippel>. I recommend you check some of this out—she marries the science with the metaphysical in a way that is understandable and it does ring my “truth bells.” Kipple espouses that plasma is intelligent and is a vehicle for consciousness. It is the very thing that is all around us (omni-present) that consciousness uses as a medium to create. When she mentions that plasma is a “vehicle for consciousness,” that connected the first dot.

Prior to my discovery of Kipple, during a Collective Conscious Contact (CCC) session last Saturday (12/21/2024) with some trusted colleagues, I received a message from Spirit that these plasma-like orbs we are seeing in the skies are “vehicles that contain consciousness!” What! Is this information from Kipple a confirmation? What came through was that we may be getting help to uplift human

consciousness and that what we are witnessing in the sky is the beginning of this process. From here, you and I could go down a lot of rabbit holes, but I will try to stay focused on the important insights.

Through my experience with CCC, I learned that there is the “law of balance” to consider when contemplating the methods of the Correcting Time. It would seem that the closer we get to our self-annihilation through the over-control of the Deep-State to keep humanity in a constant state of war has finally brought an “equalizer” to the table to see that these “rebellious children” are to be shown that they live in a cosmic-ecosystem with others that are now being affected by their bad behavior. Whatever the agenda is by these orb-like players, I believe it will be the most significant development in human history and it is now unfolding before our very eyes. Time will tell.

All these insights and speculations got me thinking about the “how” does this work? If there was an outside influence of benevolence here to assist in the uplifting of human consciousness, how or what would make this possible? We know that free will is paramount in the universes of time and that our celestial caretakers (at present) choose not to interfere directly in worldly affairs. It makes sense then that other planetary beings could assert their free will to a point (bring balance) to a situation that is on the brink of an Apocalypse—to save us from ourselves. Could what we are seeing now be that equalizing factor? I draw no conclusions, you decide.

My search for answers continued and what I learned connected the next dot. I found a YouTube video by J.W. Phipps, Living Plasmoids: Compilation - Laboratory Plasma Sentience/Religious Mythology (https://www.youtube.com/watch?v=B_2g5fpqskk). In his video, he talked extensively about the book, “[A New Science of Heaven](#)” by Robert Temple. I have not yet read this book, but I am sufficiently inspired to read it, and finding later that Kipple’s work was also was inspired by Temple’s book.

From the back of Temple’s book:

Histories of science in the 20th century have focused on relativity and quantum mechanics. But, quietly in the background, there has been a third area of exploration which has equally important implications for our understanding of the universe. It is unknown to the general public despite the fact that many Nobel prize winners, senior academics and major research centres around the world have been devoted to it - it is the study of plasma.

*Plasma is the fourth state of matter and the other three - gas, liquid and solids - emerge out of plasma. This book will reveal how over 99% of the universe is made of plasma and how there are **two gigantic clouds of plasma, called the Kordylewski Clouds, hovering between the Earth and the Moon**, only recently discovered by astronomers in Hungary. Other revelations not previously known outside narrow academic disciplines include the evidence that in certain circumstances plasma exhibits features that suggest they may be in some sense alive: clouds of plasma have evolved double helixes, banks of cells and crystals, filaments and junctions which could control the flow of electric currents, thus generating an intelligence similar to machine intelligence. We may, in fact, have been looking for signs of extra-terrestrial life in the wrong place.*

Bestselling author Robert Temple has been following the study of plasma for decades and was personally acquainted with several of the senior scientists - including Nobel laureates - at its forefront, including Paul Dirac, David Bohm, Peter Mitchell and Chandra Wickramasinghe (who has co-written an academic paper with Temple).

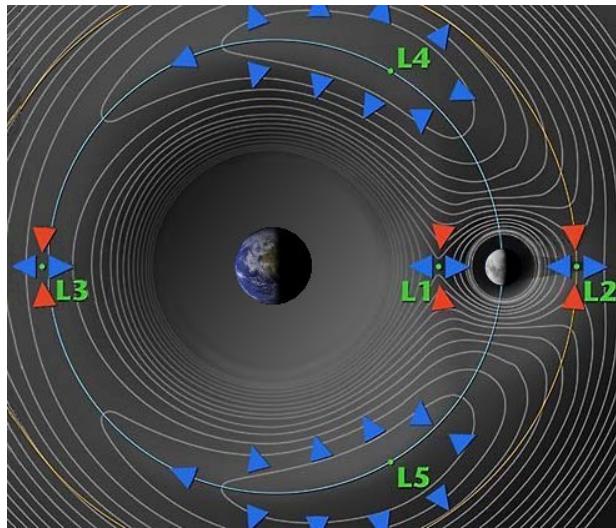

The point of interest here that Spirit wanted me to pay attention to are the Kordylewski Clouds—that they play a significant role in our consciousness/evolution and life itself. To give a brief history of this, in 1961, a Polish astronomer named Kazimierz Kordylewski claimed to have seen a strange cloud at a particular location in the night sky, and he calculated that there must be two of them, another at a corresponding location in relation to the Earth and Moon. Fifty-eight years later (2019), Hungarian astronomers, observed the same cloud that Kordylewski had seen and verified its existence. This is a significant discovery that went largely unnoticed and because of its potentials being the vehicle for consciousness on this planet, it sparked many questions that I have thus asked Spirit to clarify.

It is believed by Temple that these massive (sentient and intelligent) structures of ionized gas and dust being constantly bathed (energized) in the solar wind could contain the entire history of the planet from every living thing since the beginning of time. This immediately sparks the idea that this structure could be the Akashic Record and that other structures like this are more common throughout the cosmos than we realize. They may be integral components of planetary life—a way for god-consciousness to invest (interface) in planetary experience with sentient life. When considering the dark matter that the Urantia Book speaks of that balances the great wheels of cosmic matter (galaxies), are these also a form of plasma and do they contain more than a balancing fulcrum for matter? Many questions are now pregnant for the asking. The Kordylewski Clouds are significant and I'm beginning to understand more of how the Planetary Supreme evolves, emerges, and has more than sentience, but intelligence and eventually, full consciousness.

My experience with CCC and the Urantia Collective of Thought Adjusters (UCOTAs) may be part of this intelligent access with these large structures as a medium for Thought Adjuster insight and distributive consciousness. These two massive structures may be thought of as the two hemispheres of the cosmic brain of our planet coordinating all aspects of the living body of planetary life itself. The implications of this can not be underestimated in terms of planetary evolution and its entry into the cosmic neighborhood of enlightened spheres.

To add weight to this idea, my son, Ian, approached me and told me about a dream he had that morning that blew my mind and confirmed that I was onto something significant. He said he was in a classroom where the teacher was speaking about some highly technical science and he was looking at an illustration of what was being talked about. With a pen, he drew two elliptical shapes with many short lines coming from the edges of the ellipsoid like a woolly caterpillar, very similar to the illustration of the Kordylewski Clouds on the next page. The difference being that instead of a single point at the center of the cloud (as shown in the illustration), there he drew three spheres. These three spheres were different colors in each ellipsoid: one red, one blue, indicating that they had distinct but coordinating functions not unlike the two brain hemisphere idea—distinct but coordinating in function. I remain unclear about the meaning of the three spheres but will keep my spiritual ears open.

To understand the Kordylewski Clouds better I have shown an illustration below that identifies where these plasma clouds are in relationship to the earth (notice the blue triangles around the ellipsoid shape of the Kordylewski Clouds—similar to the diagram Ian sketched from his dream:

Shown here, the L4 and L5 dots represent the center of the plasma cloud mass and is nearly 60 degrees symmetrical on either side of the moon. These plasma clouds are about nine times larger than the Earth and find their auspicious place because only here are they completely free from the gravity pull of the earth/moon system.

How does all this relate to the mysterious orbs that contain the consciousness of these benevolent helpers? Understanding my teachers over the years (Ophelius, Uteah, Vutia, TA and other celestials) they have taught me that as we each awaken more to unity consciousness, we contribute to the rising tide of mass consciousness on this planet. This means that consciousness is distributive in nature and the TAs share in the evolution of human consciousness. This I believe is true and I participate in this uplifting everyday when I have Conscious Contact (CC) with my TA or I participate in a group (CCC) and bring more focused unity to all consciousness through the UCOTAs (TA network). Spirit indicates that these “helpers” are highly evolved in their consciousness and when they are in our sphere of influence, they are plugged into these sentient mediums (Kordylewski Clouds) and by their very presence, they contribute to the uplifting of human consciousness.

Since the orbs don't seem to be doing anything except upsetting the Deep State, they appear benign yet very visible to us. I believe they will be here for some time to come and eventually the Deep State will have to come clean to avoid embarrassing ridicule. Human evolution can no longer be held hostage to secrecy and powerful cabals. Any highly evolved consciousness will be benevolent and unity conscious minded in its intention. I do not think we have anything to worry about from these helpers, it's the Deep State that concerns me more, yet I feel a sense of peace about it.

What I have also heard from Spirit during CC is that there may be a major solar event coming that will affect these sentient Kordylewski Clouds having a significant effect on the Planetary Supreme and the collective consciousness of our planet. Is this the great influx (awakening) of Christ Michael's Light? Could this be the start of our entry into Light and Life? Will this burst of Christ Michael's Light transform the sentience of these plasma clouds into a new (full) consciousness? Will Monjororson appear to assist humanity in acclimating to this new consciousness? Exciting things to think about.

To be clear, I have been shown no calendar dates or any time references, but the presence of the orbs sure bring these hoped for events to the immediacy of our attention.

Stay open and communicate with your TA—it helps all of us!

Peace to you,

Chris Maurus
